

Shire of Wiluna Policy Manual

ROAD HEIRARCHY

Policy 3.4

That as a matter of policy: the roads hierarchy adopted by Council 25.02.2014 will:

- 1 Form the basis for which road maintenance, including maintenance grading, will be considered for annual budgeting and work planning purposes (including any works contracted out by the Shire).
- 2 Form the basis for which capital road work projects will be considered for annual budgeting and work planning purposes.
- 3 Not prohibit or prevent the Shire carrying out necessary road works (operational or capital) required to ensure asset preservation and public safety irrespective of the respective road's ranking and service levels in this hierarchy.
- 4 Not necessarily be the final hierarchy (including service levels) for which road works are budgeted and undertaken as road works can be influenced by matters including: available funding (including grants), conditions of grant funding, unforeseen circumstances that adversely affect the road network, contractual arrangements or variations and other circumstances as adopted by Council from time to time.
- 5 The roads hierarchy and this policy are to be reviewed at least once each year (from adoption) but nothing prohibits it from being reviewed more frequently should operational matters dictate so or at the request of Council.

This policy is to be read in conjunction with the adopted hierarchy as follows:

Document Control	
Responsible Directorate	Office of the CEO
Relevant Section	Technical
Legislative Requirement	
Council Meeting Held & Adopted, Resolution #	25 Mar 2015 052/15
Amendments, Date & Resolution #	
Review Dates & Resolution #	
Next Review Date
